                             package.json X
    us app.js
     (s) package, json > ...
                       "keywords": [],
                       "author": ""
                       "license": "ISC",
                       "dependencies": {
                          "express": "^4.18.2"
                       "devDependencies": {
                          "nodemon": "^3.0.2"
en package json se borra el anterior codigo y se pone lo siguiente
          Depurar
         "scripts": {
             "dev": "nodemon app.js"
         "keywords": [],
 luego se ejecuta en consola el siguiente codigo para correr el proyecto
 npm run dev
   PS C:\xampp\htdocs\API> npm run dev
   > api@1.0.0 dev
   > nodemon app.js
    [nodemon] 3.0.2
   [nodemon] to restart at any time, enter `rs`
[nodemon] watching path(s): *.*
   [nodemon] watching extensions: js,mjs,cjs,json
[nodemon] starting `node app.js`
   node:events:492
        throw er; // Unhandled 'error' event
```
